Skills

Technical	: JavaScript, Firebase
Frameworks and Libraries	: React, Node.js, Next.js
Tools	: Git, Docker
Design and Creative	: UI/UX Design, Brand Design (Logos), Visual Design for Web & Applications

Experience

SOFTWARE ENGINEER: BOWL TECHNOLOGIES.

Dec 2024 - Present

- Led end-to-end development of BowlRMS, a restaurant management system integrating ordering, payments, and operations
- Designed and implemented scalable full-stack architecture using React, Node.js, and Firebase
- Integrated payment solutions including MPesa and Paystack for seamless transactions
- Drove product decisions, feature development, and system improvements based on user needs
- Managed deployment, debugging, and continuous system optimization

PROJECTS

BowlRMS

Restaurant management system enabling efficient ordering, payments, and business operations

- Built full-stack system using React, Node.js, and Firebase with focus on performance and usability
- Integrated AI-assisted ordering experience to improve customer interaction

Nijue.me

A milestone-based platform for sharing achievements with verifiable proof

- Designed and developed platform emphasizing authenticity and structured storytelling
- Focused on clean UI/UX and meaningful user engagement

Bidbee

Localized bidding platform tailored for dynamic pricing and user participation

- Built core bidding logic and user interaction flows
- Focused on accessibility and localized market needs

Education

Kirinyaga University | Expected Graduation: 2027

Bachelor of Technology in Electronics and Computer Engineering (Ongoing)

ADDITIONAL INFORMATION

- Strong problem-solving and systems thinking skills
- Experience working across technical, product, and business domains
- Passion for building impactful, real-world solutions
